Circular

We are pleased to announce a Value Added **Microsoft Training** Program scheduled from 1st July 2021 to 22nd July 2021. This program aims to enrich participants' proficiency in Microsoft technologies and applications, providing an additional layer of skill development. This is an excellent opportunity to augment your skill set in this rapidly evolving technological landscape.

For registration and further details, kindly liaise with the organizing team- Dr Shanthi Priya- Department of Prosthodontics

MNR DENTAL COLLEGE AND HOSPITAL SANGAREDDY

1. Name of the program: Microsoft training program

2. Justification:

We live in a world that is mobile-first and cloud-first. Computing is pervasive, with experiences that transcend devices and demonstrate ambient intelligence. Billions of sensors, displays, and gadgets – in conference rooms, living rooms, cities, automobiles, phones, and PCs – form a massive network and streams of data that fade into the background of our existence. This computer capacity will digitize practically everything around us and glean insights from all of the data created by human interactions and human-machine interactions. We are transitioning from a world where computing power was scarce to one where it is now nearly boundless, with human attention becoming the actual precious commodity. In today's world, everyone has heard of Microsoft because of the Windows operating system and office software that it supplies, and practically everyone uses it.

This training program was intended for the First year PG students to master the foundations of creating and editing basic documents in Microsoft Office.

3. Conducted by:

Mr. Manikandan

4. Number of students attended: 40

5. Report of the activity:

The program was started on 1-7-2021. The session began with a welcoming note by Dr. Ravindra SV, Vice Principal, MNR Dental College, Sangareddy. A detailed PowerPoint presentation with visual effects was displayed by the speaker to catch the student's attention. The content of the topic was well-explained to the students by the speaker during the program at multiple sessions. The speaker Mr. Manikandan has given an introduction about the Microsoft team. He has also shown how to create and format a document, deal with images, tables, and charts. He also explained the latest Microsoft courses.

Queries of the delegates were welcomed and the answers were discussed by the speakers. The session was concluded with a vote of thanks by Dr. Shanthi Priya.

6. Conclusion:

We have conducted this value-added course to teach the breadth of Microsoft virtual desktop technology for first-year MDS students. MDS students must do research papers as well as numerous presentations and this program assists them in accomplishing their goals.

presentation

EXCEL

Why a SpreadSheet?

- A spreadsheet is the computer equivalent of a paper ledger sheet. It contains a grid made from columns and rows. It is an environment that can make numerical manipulation easy.

Life Stage Group	(mg/day)
0-6 months	210
6-12 months	270
1-3 years	500
4-8 years	800
9-13 years	1300
14-18 years	1300
19-13 years	1000
Average mg/day	768.57

Life Stage Group	(mg/d)
0-6 months	210
6-12 months	270
1-3 years	500
4-8 years	800
9-13 years	1300
14-18 years	1300
19-13 years	1000
Average mg/day	768.5

- If you change the mg/day amount, you will have to start the math all over again. In the computer version you can change the values and the result is automatically calculated.

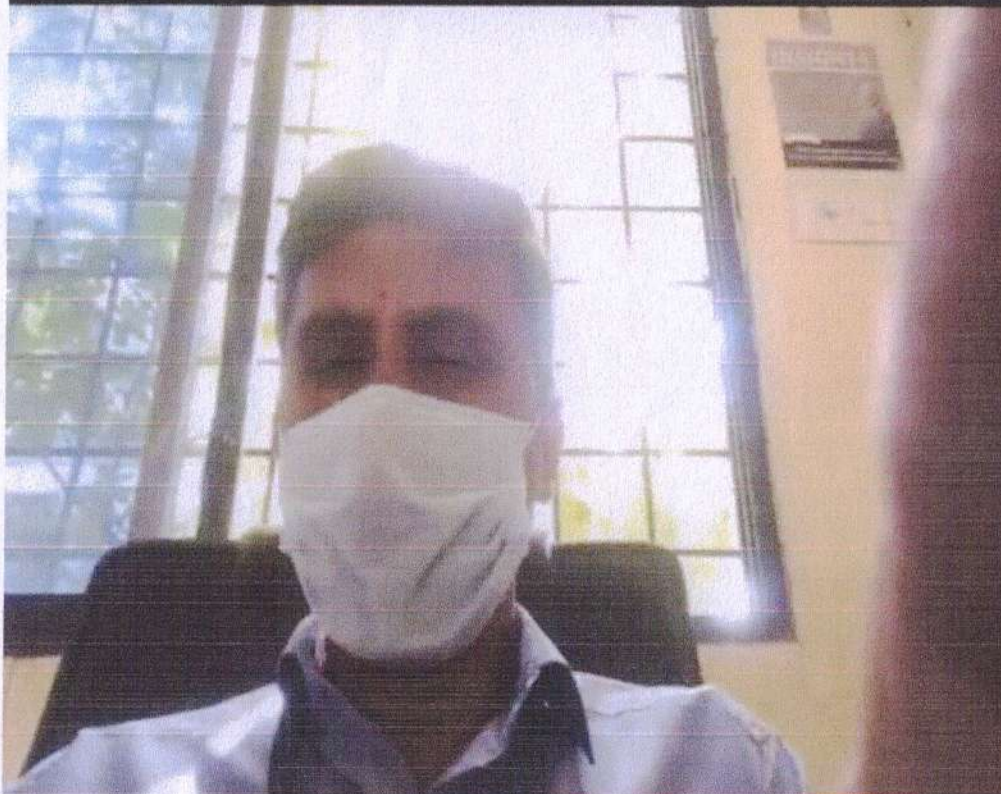

- Let the **COMPUTER** do the calculation

VALUE ADDED PROGRAMME

DEPARTMENT OF ORAL AND MAXILLOFACIAL SURGERY

PROGRAMME LIST

<u>TIME</u>	<u>TOPIC</u>	<u>SPEAKER</u>
9:00 - 1:00pm	BIOMEDICAL WASTE MANAGEMENT	Dr. RAMESH. K

1. NAME OF THE PROGRAMME: VALUE ADDED PROGRAM (online)

2. JUSTIFICATION:

Biomedical waste is a kind of waste that visually appears to be of medical or laboratory origin like sharps, used gloves, face masks, dressings, infusion kits etc. that are mainly restricted from environmental release.

The goals of biomedical waste treatment are to reduce or eliminate the waste's hazards, and usually to make the waste unrecognizable. Steps in the management of biomedical waste which includes generation, accumulation, storage and handling, treatment, transport and waste disposal were discussed in the program. Treatment should render the waste safe for subsequent handling and disposal. The latest guidelines for segregation of bio-medical waste recommending the colour coding were also discussed.

3. CONDUCTED BY:

1. Dr. Harsha G
2. Dr. Ramesh K
3. Dr. Aditya Mohan. A
4. Dr. Rathod Prakash

4. NUMBER OF STUDENTS ATTENDED: 46

5. REPORT OF THE ACTIVITY:

The online session (August month 2021) began with a welcoming note by Dr. Harsha. The speaker of the program was Dr. RAMESH.K. The speaker Dr. RAMESH.K gave a detailed power point presentation description on Bio medical waste management, its generation, accumulation, storage and how to handle it, transport and waste disposal with recommended

colour coding was presented. Queries of the delegates were welcomed and the answers of the topic were discussed by the organizing committee.

The session was concluded by Dr. Aditya Mohan.

Curricular activity of the department is deficient so we have conducted the value added courses so as to improve the curriculum.

MNR Dental College
SANGAREDDY

**MNR DENTAL COLLEGE AND HOSPITAL
SANGAREDDY**

1. Name of the program: GREEN DENTISTRY

2. Justification: Eco- friendly dentistry is a new upcoming emerging concept in dentistry. It is a high tech approach, which reduces the environmental impact of dental practices in moving toward an ecologically sustainable health care system. It also encompasses a service model for dentistry that supports and maintains wellness. Friendly dentistry is an approach to meet the needs of millions of patients and helps dental professionals to protect planetary and community health as well the financial health of their practices. In dentistry, the biomedical waste generated includes sharps, used Disposable items, infectious waste (blood-soaked cotton, gauze, etc.), hazardous waste (mercury, lead), and chemical waste (such as spent film developers, fixers, and disinfectants).

3. Conducted by: Dr. Sathya Narayana

4. Number of students attended: 40

5. MODE: online virtual mode

6. Report of the activity:

The program was started on 4-10-2021. The session began with a welcoming note by Dr. Ravindra SV HOD and Principal, Department of Oral Medicine and Radiology. A detailed PowerPoint presentation with visual effects was displayed by the speaker to catch the student's attention. The content of the topic was well-explained to the students by the speaker during the program. The speaker Dr. Sathya Narayana has gave an introduction about green dentistry on 04-10-21. In later sessions the speaker explained the components of green dentistry, conservation principles, concepts of 4R in it and hoe to be a part of green dentistry.

Queries of the delegates were welcomed and the answers were discussed by the speakers.

The session was concluded with a vote of thanks by Dr. Ravindra SV.

7. Conclusion:

We have conducted this value-added course to teach budding Under Graduate students about importance of green dentistry in regular practice.

ACTIVITY REPORT

TITLE: BLS and Venipuncture Training Programme

OBJECTIVE: To train the students in Basic life support and Veni- Puncture lecture and Hands on course

DATE: 29/11/2021, 30/11/2021, 1/12/2021, 02/12/2021, 03/12/2021 & 04/12/2021

TIME: 3- 5 PM

LOCATION: MNR Medical College & Hospital

ORGANISED BY: MNR Dental College & Hospital

AUDIENCE: Faculty Members, Post graduate students and Interns

NO OF PARTICIPANTS: 30 members

SPEAKER: Dr. Pramod, Professor Department of Anesthesia, MNR Medical College & Hospital

MATERIAL ADOPTED: offline

MATERIAL USED: Chalk and Board with BLS and Venipuncture Simulators and a Biphasic Defibrillator

DESCRIPTION: Dr. Pramod ,Guest lecturer gave lecture on Basic Life Support and its recent advances in emergency drugs, detailed description regarding various defibrillators and its role in pediatric dentistry.

QUESTIONS ASKED BY PARTICIPANTS:

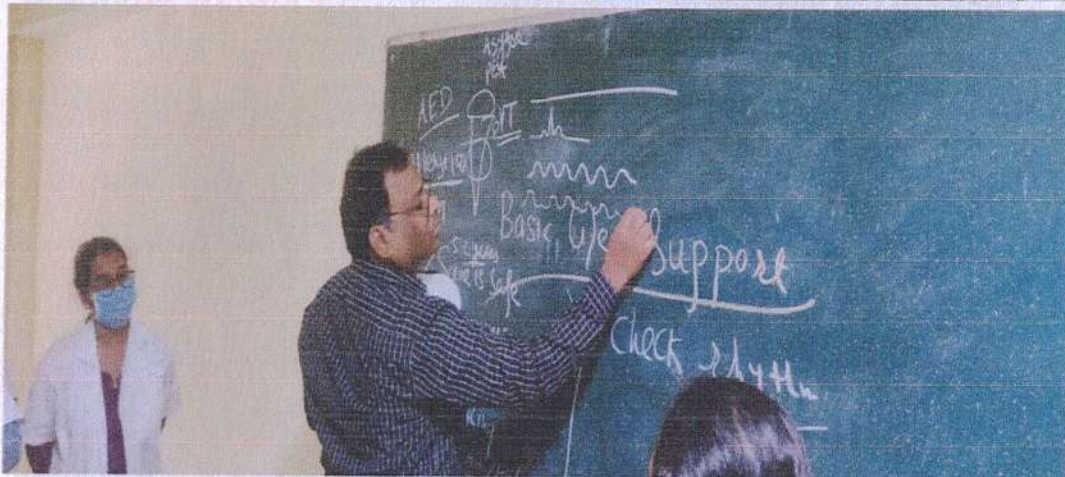

1. How much time we need to perform cpr in a non shockable case?
2. How do we differentiate non shockable rhythm to a shockable rhythm?
3. Difference between defibrillator and AED?
4. Variations in cardiac compressions in an infant?
5. Venipuncture commonly used guage of the needle?

ANIMAL HOUSE RESOURCE TRAINING PROGRAM

ACTIVITY REPORT

Dates: LECTURE: 08/11/2021- 13/11/2021

TRAINING PROGRAM: 15/11/2021 – 20/11/2021

Time: 11:30 am - 1:30 pm

Location: MNR College of Pharmacy

Audience: post graduates, under graduates, staff

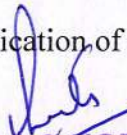

Co-ordinator: Dr. Ravi Kumar, Professor
Department of Pharmacy
MNR College of Pharmacy

Attendance: 45

MNR Dental College has an established animal house for teaching, training and research activities for students. The facility is CPCSEA approved with animal area, quarantine sections, store room and surgical and experimental rooms.

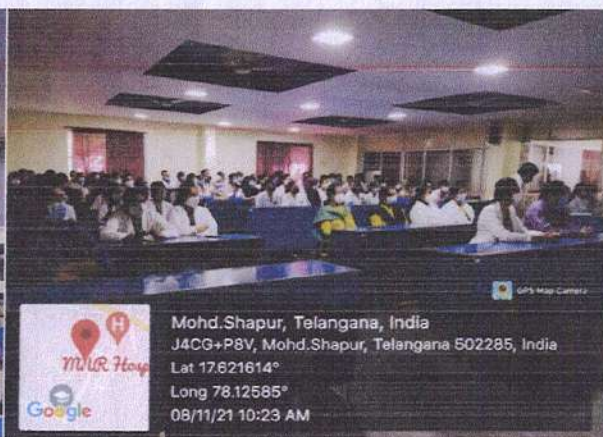

The animal house resource training program was conducted in MNR college of pharmacy, Dr R.V Ravindra garu, Principal in charge , MNR Dental college, welcomed the chief guest, Dr Ravi Kumar , Professor ,MNR college of Pharmacy. The program was conducted to bring awareness about Institutional Animal Ethics Committee (IAEC) that advises the students, teachers/researchers on facilities, policies and practices concerning the care and use of animals.

Conclusion: The program gave an understanding of animal ethics and students gained an insight on the application of animal models in dentistry.

VALUE ADDED PROGRAMME

DEPARTMENT OF PUBLIC HEALTH DENTISTRY

Date: April 4, 2022 - April 13, 2022

Venue: Lecture Hall 2, MNR Dental College

Organizers: PUBLIC HEALTH DENTISTRY

Speakers: Dr. Satyanarayana and Dr. D Shravya

PROGRAMME SHEET

S N.o	TOPIC	SPEAKER	HOURS
1	Hepatitis B: Overview and Transmission	Dr SATYANARAYANA	3 HOURS
2	Hepatitis B Vaccination for Dentists: Occupational Protection	Dr SATYANARAYANA	3 HOURS
3	Hepatitis B Vaccination Protocols for Dental Healthcare Workers	Dr SATYANARAYANA	4 HOURS
4	Infection Control in Dental Settings: Preventing Hepatitis B Transmission	Dr D SHRAVYA	4 HOURS
5	Hepatitis B and Dental Patient Management	Dr D SHRAVYA	3 HOURS
6	Public Health Impact: Dentists as Advocates for Hepatitis B Vaccination	Dr D SHRAVYA	3 HOURS

1. NAME OF THE PROGRAMME: Hepatitis B vaccination

2. Date : 4-4-22 TO 13-4-22

3. NUMBER OF STUDENTS ATTENDED: 61

JUSTIFICATION: Hepatitis B is a potentially life-threatening liver infection caused by the Hepatitis B virus. It is a major global health problem and the most serious type of viral Hepatitis. It can cause chronic liver disease and puts people at high risk of death from cirrhosis of the liver and liver cancer.

A vaccine against Hepatitis B has been available since 1982. Hepatitis B vaccine is 95% effective in preventing HBV infection and its chronic consequences. The vaccine can be given as either three or four separate doses, as part of existing routine immunization schedules.

PRINCIPAL

MNR Dental College & Hospital
MNR Nagar, Narsapur Road,
SANGAREDDY Dist. - 502 294 (T.S.)

All the individuals should receive the Hepatitis B vaccine: this is the mainstay of Hepatitis B prevention. The vaccine has an outstanding record of safety and effectiveness. Since 1982, over one billion doses of Hepatitis B vaccine have been used worldwide.

The complete vaccine series induces protective antibody levels in more than 95% of infants, children and young adults. After age 40, protection following the primary vaccination series drops below 90%. At 60 years old, protective antibody levels are achieved in only 65 to 75% of those vaccinated. Protection lasts at least 20 years and should be lifelong.

Introduction:

The Value-Added Program on Hepatitis B Awareness in Dental Healthcare, held at Lecture Hall 2 of MNR Dental College from April 4th to April 13th, 2022, aimed to enrich dental healthcare professionals' understanding of Hepatitis B and its implications in dental settings. Through a series of insightful sessions, the program provided attendees with comprehensive knowledge to enhance their patient care, occupational protection, and public health advocacy efforts.

Session Highlights:

Overview and Transmission of Hepatitis B (Dr. Satyanarayana)

Dr. Satyanarayana's opening session provided a thorough overview of Hepatitis B, including its transmission pathways, risk factors, and global impact. Attendees gained a deeper understanding of the virus's significance in public health.

Hepatitis B Vaccination for Dentists: Occupational Protection (Dr. Satyanarayana)

Dr. Satyanarayana focused on the critical role of Hepatitis B vaccination in ensuring the safety of dental healthcare professionals. His session underscored the importance of vaccination as an essential measure for occupational protection.

Hepatitis B Vaccination Protocols for Dental Healthcare Workers (Dr. Satyanarayana)

Dr. Satyanarayana continued his discussions by detailing vaccination protocols tailored specifically for dental healthcare workers. Practical insights into dosages, schedules, and potential side effects were shared, enabling attendees to implement vaccination strategies effectively.

Infection Control in Dental Settings: Preventing Hepatitis B Transmission (Dr. D Shravya)

Dr. D Shravya's session focused on infection control practices crucial for preventing Hepatitis B transmission in dental settings. Attendees learned about best practices in sterilization, barrier methods, and maintaining stringent hygiene standards.

Hepatitis B and Dental Patient Management (Dr. D Shravya)

Dr. D Shravya continued her contributions by delving into the management of dental patients with Hepatitis B. Attendees were educated on guidelines and precautions necessary during patient treatment to ensure both safety and infection control.

PRINCIPAL

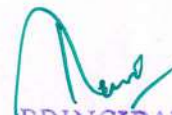

MNR Dental College & Hospital
MNR Nagar, Narsapur Road,
SANGAREDDY Dist. - 502 294 (T.S.)

Public Health Impact: Dentists as Advocates for Hepatitis B Vaccination (Dr. D Shravya)

Dr. D Shravya's final session emphasized the broader public health impact of dental professionals' role as advocates for Hepatitis B vaccination. Attendees were equipped with the knowledge and tools to raise awareness and promote vaccination in their communities.

Conclusion:

The Value-Added Program on Hepatitis B Awareness in Dental Healthcare at MNR Dental College showcased the commitment to enhancing the knowledge and practices of dental healthcare professionals. Dr. Satyanarayana and Dr. D Shravya's engaging sessions provided a holistic understanding of Hepatitis B, its prevention, and management in dental settings. Attendees left the program equipped not only with valuable insights but also with the motivation to take proactive measures in occupational safety, patient care, and community advocacy. The program effectively empowered participants to make a positive impact on public health through their roles as dental professionals.

Program Objectives

- Raise awareness about dental trauma risks during sports and the importance of preventive measures.
- Educate students on the significance of mouthguards and their proper use.
- Prepare participants to recognize and respond effectively to dental injuries.
- Familiarize students with emergency response protocols for dental trauma.
- Emphasize the role of supervision and safety measures in accident prevention.
- Highlight the link between hydration, dental health, and sports performance.
- Promote regular dental check-ups for early issue detection.
- Provide a comprehensive understanding of dental trauma prevention and management.
- Foster interaction through Q&A sessions for deeper topic understanding.

Venue

Introduction:

The Value Added Program on Sports and Trauma Prevention in School Children in Dentistry was held at Lecture Hall 2, MNR Dental College and Hospital, from 7th February 2022 to 16th February 2022. The program aimed to educate students on the importance of trauma prevention and management in the context of sports activities, focusing on dental health. A series of expert speakers shared their insights on various topics related to the theme.

Mouthguard Usage: **Dr. V. Pranitha**

Dr. V. Pranitha inaugurated the program with a comprehensive session on the significance of mouthguard usage in sports. She highlighted the role of mouthguards in preventing dental injuries during physical activities and emphasized their proper fitting and maintenance. Dr. Pranitha also conducted an awareness program to school children.

Trauma Preparedness: **Dr. Nagarjuna**

Dr. Nagarjuna addressed the participants on trauma preparedness, discussing the types of dental injuries that can occur during sports activities and the initial steps to be taken in such situations. He provided valuable insights on how to assess the severity of trauma and the importance of prompt intervention.

Emergency Response Protocols: **Dr. Naseemoon**

Dr. Naseemoon elaborated on emergency response protocols in cases of dental trauma. He discussed the appropriate steps to be taken by both individuals on the field and medical professionals to ensure effective management of traumatic dental injuries.

Proper Supervision: **Dr. Sravanthi**

PRINCIPAL

MNR Dental College & Hospital
MNR Nagar, Narsapur Road,
SANGAREDDY Dist. - 502 294 (T.S.)

Dr. Sravanthi highlighted the role of proper supervision during sports activities to prevent accidents and injuries, particularly those related to dental health. She discussed strategies to enhance safety and minimize the risk of traumatic incidents.

Hydration and Dental Health: Dr. Pranitha

Dr. Pranitha discussed the connection between hydration, dental health, and sports performance. She emphasized the importance of maintaining adequate hydration levels for overall well-being and dental health, while also providing practical tips for athletes.

Regular Dental Check-ups: Dr. Nagarjuna

Dr. Nagarjuna returned to emphasize the importance of regular dental check-ups for school children engaged in sports activities. He highlighted how routine examinations can help detect potential issues early and prevent more significant dental problems.

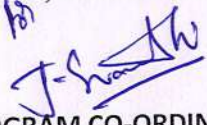

Prevention and Management of Dental Trauma: Dr. Vennela

Dr. Vennela concluded the series by discussing comprehensive strategies for the prevention and management of dental trauma. She provided insights into proper oral hygiene practices, protective measures, and the appropriate steps to be taken after a dental injury.

Conclusion and Addressing Student Queries: Dr. Vennela

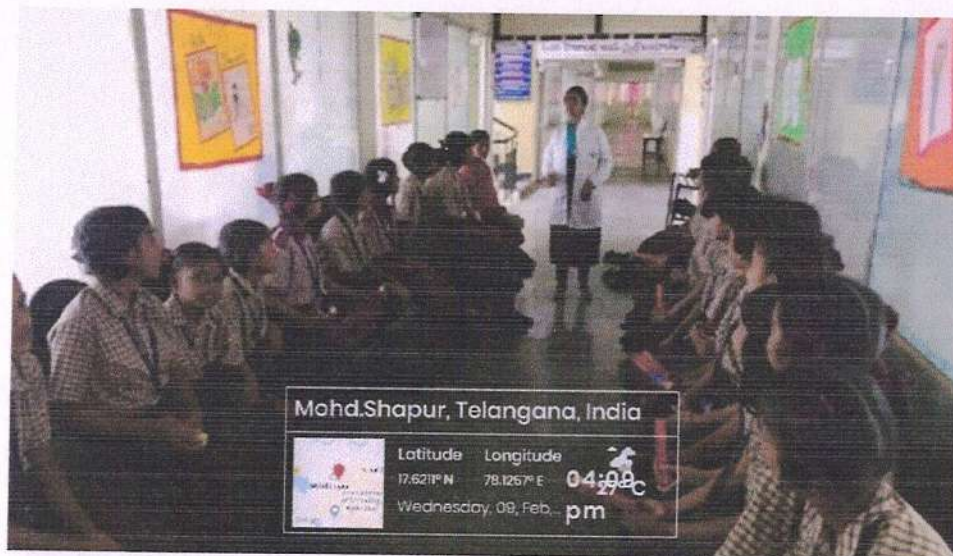

The program's conclusion was addressed by Dr. Vennela. She summarized the key takeaways from each session and underscored the importance of incorporating the knowledge gained into practice. During the Q&A session, students had the opportunity to ask questions and clarify their doubts, ensuring a deeper understanding of the topics covered.

Overall, the Value Added Program on Sports and Trauma Prevention in School Children in Dentistry provided a comprehensive platform for students to learn about the vital connection between sports activities, dental health, and trauma prevention. The expert speakers shared their expertise, and student queries were effectively addressed, fostering a valuable learning experience.

IMMUNOFLUORESCENCE IN DENTISTRY

Program Objectives

- Explore the principles of immunofluorescence.
- Understand various immunofluorescence techniques applicable to dental tissue analysis.
- Examine the role of immunofluorescence in oral autoimmune disease diagnosis.
- Learn how immunofluorescence can detect microbial pathogens in oral diseases.
- Investigate the use of immunofluorescence in oral cancer research.
- Explore the application of immunofluorescence in studying periodontal diseases.
- Understand diagnostic applications of immunofluorescence in oral pathology.

March 3, 2022 - March 16, 2022

JUSTIFICATION: Certain kind of lesions which are involved with antigen antibody reactions cannot be directly explained with the histopathology, often these lesions are explained using immunofluorescence technique. This technique uses fluorescent tagged antibodies to bind with a specific antigen and as they fluoresce, they can be located on the tissue section.

Date: March 3, 2022 - March 16, 2022

Venue: Lecture Hall 2, MNR Dental College

Organizers: MNR Dental College

NUMBER OF STUDENTS ATTENDED: 82

Introduction and Conclusion: Dr. Shamilee

Introduction:

The Value-Added Program on Immunofluorescence in Dentistry, conducted at Lecture Hall 2 of MNR Dental College from March 3rd to March 16th, 2022, provided dental healthcare professionals with an opportunity to delve into the advanced applications of immunofluorescence techniques in the field of dentistry. This program aimed to enhance participants' knowledge of immune responses, diagnostic approaches, and research applications related to oral health.

Session Highlights:

Principles of Immunofluorescence (Dr. Sunitha JD)

Dr. Sunitha JD initiated the program with an in-depth exploration of the fundamental principles of immunofluorescence. Participants gained insights into the interaction between antibodies and antigens, fluorescence labeling, and the theoretical foundation underlying immunofluorescence assays.

Immunofluorescence Techniques in Dental Tissue Analysis (Dr. Ganesh K)

Dr. Ganesh K provided a detailed overview of various immunofluorescence techniques applicable to dental tissue analysis. Attendees were introduced to direct and indirect

PRINCIPAL
MNR Dental College & Hospital
MNR Nagar, Narsapur Road,
SANGAREDDY Dist. - 502 294 (T.S.)

immunofluorescence methods, as well as the utilization of monoclonal and polyclonal antibodies for specific antigen detection.

Oral Autoimmune Diseases and Immunofluorescence (Dr. Megha K)

Dr. Megha K discussed the intersection of immunofluorescence with oral autoimmune diseases, including oral pemphigus, pemphigoid, and lichen planus. Participants learned how immunofluorescence aids in identifying autoantibodies and immune complex depositions in these conditions.

Microbial Pathogens and Immunofluorescence (Dr. Shamili)

Dr. Shamili explored the application of immunofluorescence in detecting microbial pathogens associated with oral diseases. Participants gained insights into visualizing bacteria, viruses, and fungi within oral lesions or dental biofilms.

Immunofluorescence in Oral Cancer Research (Dr. Sunitha JD)

Dr. Sunitha JD continued with a session focusing on the role of immunofluorescence in oral cancer research. Attendees gained knowledge about identifying specific biomarkers, understanding tumor microenvironments, and deciphering immune responses within oral tumors.

Immunofluorescence and Periodontal Diseases (Dr. Megha)

Dr. Megha returned to discuss the application of immunofluorescence in studying periodontal diseases. Participants learned about its role in visualizing immune cell infiltration, cytokine expression, and microbial interactions in periodontal tissues.

Diagnostic Applications of Immunofluorescence in Oral Pathology (Dr. Shamilee)

Dr. Shamilee concluded the program by discussing the diagnostic applications of immunofluorescence in oral pathology. Attendees were informed about its value in distinguishing various oral lesions, detecting immune complex depositions, and aiding treatment planning.

Conclusion:

The Value-Added Program on Immunofluorescence in Dentistry at MNR Dental College provided participants with a comprehensive understanding of advanced immunofluorescence

techniques and their applications in oral health. Dr. Shamilee's introductory and concluding remarks set the tone for the program, and all queries raised by the students were effectively addressed. Through the engaging sessions led by Dr. Sunitha JD, Dr. Ganesh K, Dr. Megha K, and Dr. Shamili, attendees gained valuable insights that will undoubtedly contribute to their enhanced expertise in dentistry and the utilization of immunofluorescence techniques.

Schedule

From May 3, 2022 to
May 14, 2022.

Sri MNR RAJU Garu,
Chairman

Patron

Sri RAVI VARMA Garu,
Vice-Chairman

Program Objectives

- Explore the principles of bone regeneration in the context of periodontics.
- Understand the techniques and materials used in Guided Bone Regeneration (GBR).
- Examine different types of bone grafts and their applications.
- Learn about the role of growth factors and biomaterials in bone regeneration.
- Explore cutting-edge approaches in tissue engineering and regenerative medicine.
- Understand the importance of monitoring and success criteria in bone regeneration procedures.

About the program

The Bone Regeneration in Periodontics program, provides dental professionals with a comprehensive understanding of bone regeneration techniques in periodontics. Led by a panel of expert speakers, this 11-day program delves into critical aspects of bone regeneration and its application in restoring lost or damaged bone tissue.

Venue

Lecture Hall 2,
MNR Dental
College.

PRINCIPAL

MNR Dental College & Hospital
MNR Nagar, Narsapur Road,
SANGAREDDY DIST-502 294 (T.S.)

VALUE ADDED PROGRAMME ON BONE REGENERATION

DEPARTMENT OF PERIODONTICS AND IMPLANTOLOGY

NAME OF THE PROGRAMME: Bone regeneration **DATE:** 3-05-22 to 14-05-22

PROGRAMME SCHEDULE:

S N.o	TOPIC	SPEAKER	HOURS
1	GUIDED BONE REGENERATION (GBR)	Dr.RAVI VARMA PRASAD	3 HOURS
2	BONE GRAFTS	Dr RUPA RANI	5 HOURS
3	GROWTH FACTORS AND BIOMATERIALS	Dr DEEPIKA V	4 HOURS
4	TISSUE ENGINEERING AND REGENERATIVE MEDICINE	Dr LAVANYA	3 HOURS
5	MONITORING AND SUCCESS CRITERIA	Dr CHAITANYA	3 HOURS
6	CONCLUSION	Dr YASASWINI	1 HOUR

JUSTIFICATION: Bone regeneration is a complex, well-orchestrated physiological process of bone formation, which can be seen during normal fracture healing, and is involved in continuous remodelling throughout adult life. Bone regeneration depends on osteoinductive factors that regulate inflammation, stimulate mineralization and resorption of cartilage tissue, and induce bone remodelling. Currently, there is a plethora of different strategies to augment the impaired or insufficient bone-regeneration process, including the 'gold standard' autologous bone graft, allograft implantation, and use of growth factors, osteoconductive scaffolds, osteoprogenitor cells and distraction osteogenesis.

NUMBER OF STUDENTS ATTENDED: 35

ACTIVITY REPORT:

The 11-day program on bone regeneration in periodontics was led by a panel of experts in the field:

PRINCIPAL

MNR Dental College & Hospital
MNR Nagar, Narsapur Road,
SANGAREDDY Dist. - 502 294 (T.S.)

Dr. Yasaswini opened the session with a welcoming note, setting the stage for the informative discussions that followed.

The various speakers included:

- **Dr. Ravi Varma Prasad**, who delved into Guided Bone Regeneration (GBR).
- **Dr. Rupa Rani**, who explored the topic of bone grafts.
- **Dr. Deepika V**, who shared insights on growth factors and biomaterials.
- **Dr. Lavanya**, who provided valuable information on tissue engineering and regenerative medicine.
- **Dr. Chaitanya**, who discussed monitoring and success criteria.
- **Dr. Yasaswini**, who concluded the session with final remarks.

During the session, a comprehensive PowerPoint presentation was delivered, offering detailed descriptions of instruments, instrument classifications, indications, and contra-indications for each instrument. Various surgical protocols and patient management techniques were also covered. The importance of meticulous surgical preparation was emphasized, as it contributes to predictable surgical procedures and minimizes post-operative discomfort.

Bone regeneration in periodontics is a crucial process aimed at restoring lost or damaged bone tissue resulting from conditions like periodontal disease. The overall goal is to reinstate the proper form, function, and stability of periodontal tissues. Key aspects in bone regeneration discussions include:

Periodontal Disease and Bone Loss: Untreated periodontal disease leads to the progressive deterioration of alveolar bone, eventually causing tooth mobility and loss.

Guided Bone Regeneration (GBR): Dr. Ravi Varma Prasad highlighted GBR as a widely used technique involving barrier membranes, bone grafts, and tissue-engineered materials. This approach fosters the repopulation of bone-forming cells while preventing the intrusion of soft tissue cells.

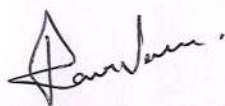

Bone Grafts: Dr. Rupa Rani explained bone grafting, which involves placing graft materials into bone defects to stimulate new bone formation. Various graft materials like autografts, allografts, xenografts, and synthetic grafts were discussed for their role in scaffolding new bone growth and enhancing regeneration.

Growth Factors and Biomaterials: Dr. Deepika V emphasized the use of growth factors (PDGF, BMPs, EMD) with or without bone grafts to promote bone regeneration. These substances enhance cellular activities, stimulate bone-forming cell proliferation, and expedite healing.

Tissue Engineering and Regenerative Medicine: Dr. Lavanya shed light on cutting-edge approaches like stem cell therapy, scaffolds, and growth factor delivery systems. These techniques advance the regeneration of periodontal tissues, including bone, by creating a conducive regenerative microenvironment.

Monitoring and Success Criteria: Dr. Chaitanya underscored the need for meticulous monitoring and evaluation of treatment outcomes. Radiographic assessments like CBCT and clinical parameters such as probing depth reduction and attachment level gain are pivotal in assessing the success of bone regeneration procedures.

The success of bone regeneration in periodontics hinges on factors like the patient's health, bone loss severity, systemic conditions affecting healing, and clinician expertise. A tailored treatment plan and multidisciplinary collaboration involving periodontists, oral surgeons, and restorative dentists are often necessary for optimal results. Dr. Yasaswini brought the session to a close, addressing participant queries with input from the organizing committee.
