VALUE ADDED COURSE PROGRAMME (2017-2018)

Dear students,

We would like to host a "Value added course program" in our MNR dental college, Sangareddy, through interdepartmental collaboration. This is in line with our goal of enriching our students with essential skills to succeed in professional life. Interested students are asked to contact curriculum committee members. We are hoping to hear a positive response from your side.

1. INFANT ORAL HEALTH CARE
2. SPECIALIZED RADIOGRAPHIC TECHNIQUES
3. DENTURE CHARACTERIZATION
4. LASERS IN PERIODONTOLOGY
5. MANAGEMENT OF MAXILLOFACIAL TRAUMA PROGRAM
6. SETINAL LYMPH NODE BIOPSY
7. HEALTH EDUCATION
8. ORTHOGNATHIC SURGERY
9. DENTAL OPERATING MICROSCOPE

SPECIALIZED RADIOGRAPHIC TECHNIQUES

<u>DATE</u>	<u>TOPIC</u>	<u>SPEAKER</u>
16-8-2017 to 19-8-2017	Specialized radiographic techniques	Dr. Satya Prakash

A) NAME OF THE PROGRAMME: Specialized radiographic techniques

B) JUSTIFICATION:

Recent advances in imaging technologies have revolutionized dental diagnostics and treatment planning. Correct use of appropriate imaging techniques and their correct interpretation, following the ALARA (As low as reasonably achievable) principles and cost-effectiveness, newer radiographic techniques can help to detect pathologies in very early stages, which ultimately help to reduce morbidity and mortality and improve the quality of life of the patients.

C) CONDUCTED BY:

Dr. Satya Prakash

D) NUMBER OF STUDENTS ATTENDED: 35

The program was conducted for 16 hours for 4 days. The session began with a welcoming note by Dr. Ashwini Kumar. The speaker of the program was Dr. Satya Prakash. The speaker addressed the students and welcomed their presence.

A detailed PowerPoint presentation was given on the topic of "Specialized Radiographic Techniques" and he explained about 2D imaging as well 3D imaging techniques. He also taught newer radiographic techniques that can help to detect pathologies in very early stages, which ultimately help to reduce morbidity and mortality and improve the quality of life of the patients.

Queries of the delegates were welcomed and answers to the topic were discussed by the organizing committee. The session was concluded with a vote of thanks by Dr. Prashanth.

MANAGEMENT OF MAXILLOFACIAL TRAUMA PROGRAM

1. Name of the program: Management of Maxillofacial Trauma Program

2. Justification:

Trauma is a leading cause of morbidity and mortality worldwide. Maxillofacial injuries that present as a component of major trauma, which is an important subgroup of admissions as mortality may be as high as 10%. Facial or maxillofacial trauma occurs as a consequence of physical injury to the face and can include damage to soft tissue and bony structures either in isolation or combination. There is a male predominance with highest incidence in the age group of 20- 40 years. The range of injuries include soft tissue damage, bruising, lacerations, burns and fractures of the underlying facial skeleton including the zygomatic complex, mandible, maxilla, orbit and naso-ethmoidal complex. The concentration of special senses in the head and neck region means that even seemingly minor injuries can have a significant impact upon the long-term outcome for a patient. Careful assessment of an injured patient must include a full ATLS evaluation to ensure that associated potentially life-threatening injuries are not missed.

This training program was intended for the First year PG students and interns to learn how to assess and manage a maxillofacial trauma under emergency condition and as a secondary care.

3. Conducted by:

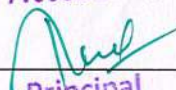

Dr. K. Ramesh, MDS, Professor of Oral and Maxillofacial Surgery

4. Number of students attended: 55

5. Report of the activity:

The program was started on 12-02-2018. The session began with a welcoming note by Dr. Sujatha Gopal, MDS, Principal and HOD of Conservative dentistry and Endodontics. A detailed Power Point presentation with visual effects was displayed by the speaker to catch the student's attention. The content of the topic was well-explained to the students by the speaker during the program. The speaker Dr. K. Ramesh (professor) has gave an introduction about the

// Attested //

Principal
MNR Dental College
SANGAREDDY

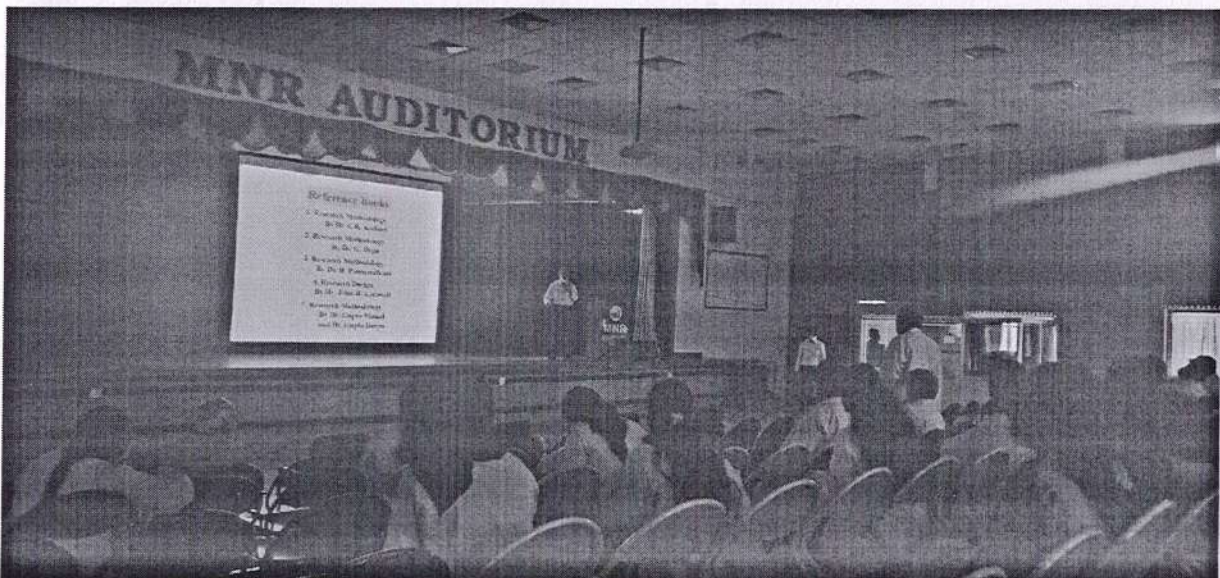

primary assessment and triage and initial management of maxillofacial trauma on 12-02-2018. On the second and the third day a detail description about Midfacial and mandibular trauma and its management was discussed. On 15-02-2018, he added a note on basic and advanced life support during the emergency trauma conditions.

Queries of the delegates were welcomed and the answers were discussed by the speakers.

The session was concluded with a vote of thanks by Dr. Sujatha Gopal.

6. Conclusion:

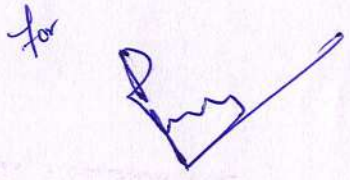

We have conducted this value-added course to teach first-year MDS students and interns to gain confidence to manage a maxillofacial trauma in necessary conditions.

Management of maxillofacial trauma explained to the students with the help of a detailed power point presentation

SENTINEL LYMPHNODE BIOPSY

<u>DATE</u>	<u>TIME</u>	<u>TOPIC</u>	<u>ORGANIZER</u>
06.03.2018	9:00-1:00	LYMPHOID ORGAN	Dr. SUREKHA V

NAME OF THE PROGRAMME: Value Added programme – LYMPHOID ORGAN AND LYMPH NODES

JUSTIFICATION: The organ of the lymphatic system, and carries out various immune functions. The lymphatic system is comprised of lymphatic vessels, lymph nodes, associated organs made up of lymphoid tissues (e.g. spleen, thymus, etc.), and lymph. There are two primary lymphatic organs: the red bone marrow and the thymus gland.

CONDUCTED BY:

1. Dr. Prasanna M.D
2. Dr. Surekha V
3. Dr. Kranthi Kiran Reddy. E
4. Dr. Sangameshwar

The program was conducted by Department of oral pathology and microbiology, in lecture hall 2, at MNR Dental College and hospital. Undergraduate students attended the session. Speaker Dr. Surekha highlighted the importance of understanding the basic structure and nature of the lymphoid organ and lymph nodes there by implicating in best diagnosis. Questions and doubts were cleared following lecture session.

REPORT OF THE ACTIVITY:

Curricular activity of the department is deficient so we have conducted the value added courses so as to improve the curriculum.

<u>DATE</u>	<u>TIME</u>	<u>TOPIC</u>	<u>ORGANIZER</u>
08.03.2018	9:00-1:00	B-CELL lineage & B-CELL MEDIATED IMMUNITY	Dr. Sangameshwar

NAME OF THE PROGRAMME: Value Added programme – B-cell lineage & cell mediated immunity.

JUSTIFICATION: B cells are derived from the bone marrow (or bursa cells in birds), originating from hematopoietic stem cells, which differentiate into multipotent progenitor cells then into common lymphoid progenitor cells. Humoral immunity is also called antibody-mediated immunity. With assistance from helper T cells, B cells will differentiate into plasma B cells that can produce antibodies against a specific antigen. The humoral immune system deals with antigens from pathogens that are freely circulating, or outside the infected cells. Questions and doubts were cleared following lecture session.

CONDUCTED BY:

Dr. Prasanna M.D

Dr. Surekha V

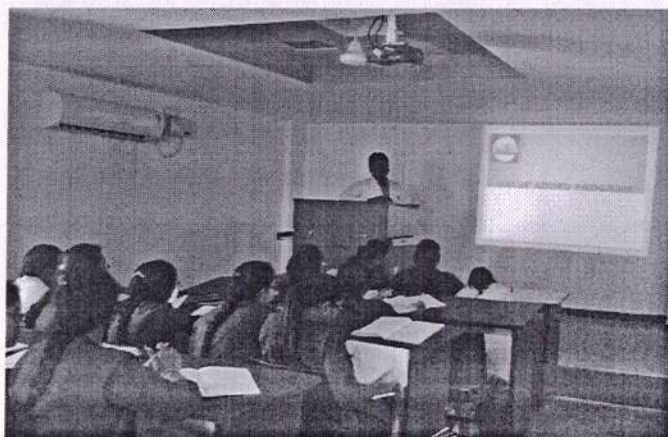

Dr. Kranthi Kiran Reddy. E

Dr. Sangameshwar

The program was conducted by Department of oral pathology and microbiology, in lecture hall 2, at MNR Dental College and hospital. Undergraduate students attended the session. Speaker Dr. Sangameshwar highlighted the importance of understanding the basic nature of the B-cell lineage and immunity.

REPORT OF THE ACTIVITY:

Curricular activity of the department is deficient so we have conducted the value added courses so as to improve the curriculum.

ORTHOGNATHIC SURGERY

1. NAME OF THE PROGRAMME: Orthognathic surgery

JUSTIFICATION: Orthognathic surgery is surgery aimed to correction of functional and aesthetic of severe dentofacial deformity through combination of orthodontic, surgical and possibly restorative dentistry. However, the most common reason for patients seeking combined orthodontic and surgical treatment is dental and/or facial aesthetic problems.

2. CONDUCTED BY:

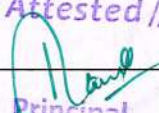

1. Dr. P.S Raju
2. Dr. Jayaprakash Reddy
3. Dr. Sujan Kumar

4. NUMBER OF STUDENTS ATTENDED: 40

The program was conducted for two days. The session began with a welcoming note by Dr. Madhav. The speaker of the program was Dr. Sujan Kumar. The speaker addressed the students and welcomed their presence.

A PowerPoint containing detailed description of role of orthodontist in orthognathic surgery was explained. Orthognathic surgery can eliminate severe esthetic and functional deformities and be a life-changing event for a patient. An orthodontist's role in orthognathic surgery can be divided into several phases: the initial evaluation, presurgical orthodontics, surgical planning, and postsurgical orthodontics. At each of these phases, collaboration between the orthodontist and the surgeon is critical. The ability of an

// Attested //

Principal
MNR Dental College
SANGAREDDY

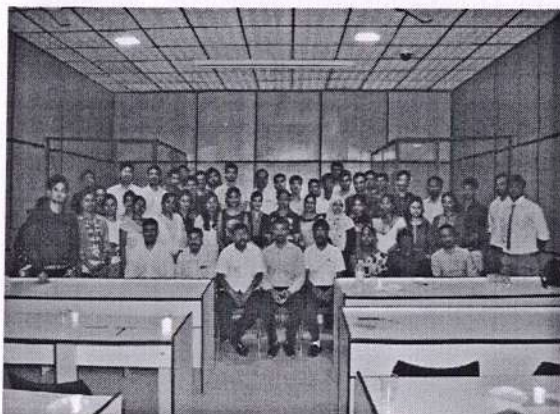

orthodontist and a surgeon to coordinate their efforts during this time is what will lead to a successful outcome.

Queries of the delegates were welcomed and the answers of the topic were discussed by the organizing committee.

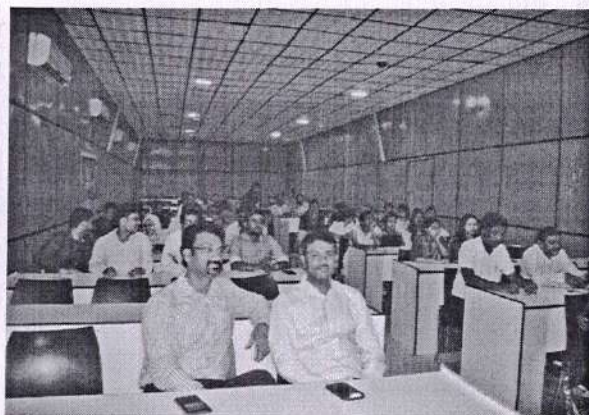

The session was concluded with vote of thanks given by Dr. Madhav

REPORT OF THE ACTIVITY:

Curricular activity of the department is deficient so we have conducted the value added courses so as to improve the curriculum.

DENTAL OPERATING MICROSCOPE

<u>DATE</u>	<u>9am-10am</u>	<u>10am-11am</u>	<u>11.10am-12pm</u>	<u>12pm-1pm</u>	<u>GUEST SPEAKER</u>
16.04.20 18	Introduction, history	Parts of a dental operating microscope	Parts of dental op microscope- Continued	Properties of a microscope	Dr. Pavan kumar
17.04.20 18	Different types of microscopes	How does it work	How does it work- continued	Ergonomic working positions	Dr. Pavan kumar
18.04.20 18	Advantages of using a dental op microscope	Advantages - continued	Disadvantages of using a dental op microscope	Disadvantages – continued	Dr. Pavan kumar
19.04.20 18	Hand on demonstration	Hand on demonstration	Applications & recent advances	Conclusion	Dr. Pavan kumar

NAME OF THE PROGRAMME:

Dental operating microscope

JUSTIFICATION:

The dental operating microscope has become an integral part of endodontic practice. For both nonsurgical and surgical endodontic therapy it is indispensable for Excellency. Besides the obvious benefits for clinical practice, evidence has become available that demonstrates better
