D.O.Lr.No.ITEC-14/ETRM/2/2021, Dated: 26.04.2022

Dear Dr. Alwala,

Sub:- NCAM - Invitation for National Conference on 3D Printing in Medical Implants & Devices - Reg.

Greetings from the state of Telangana!

We are delighted to share that the Government of Telangana in partnership with the Ministry of Electronics and Information Technology (MeitY), the Government of India has established the **National Centre for Additive Manufacturing (NCAM)** in Hyderabad, Telangana.

2. The NCAM is established as an independent agency to build a comprehensive ecosystem of additive manufacturing in the country by enabling the adoption of additive manufacturing in the industry, prototyping new products and focusing on indigenization, access to state of art infrastructure, enabling research and development of standards and new product development, and promoting skill development activities to generate quality manpower.

3. One of the core mandates for NCAM is to promote the adoption of AM technology in India and raise awareness of potential benefits and address challenges in the ecosystem by collaboratively working with relevant stakeholders. In this regard, the NCAM is organising a **National Conference on 3D Printing in Medical Devices & Implants on May 13th (Friday)** at **Hyderabad International Convention Centre (HICC), Novotel Hotel**. This **One-Day National Conference** will be attended by senior medical professionals, industry leaders, academic experts and senior officials from the government to discuss the current landscape and strategies for accelerating additive manufacturing of Medical Devices & Implants.

4. It's our pleasure to invite you to the panel discussion on **Challenges vs Opportunities for Implant Manufacturing**. We request you to kindly confirm your presence at this event. The detailed agenda shall be shared closer to the date.

Looking forward to your esteemed presence at the event.

Yours faithfully,

(JAYESH RANJAN)

Principal Secretary, ITE&C Dept., &
Chairman, Board Directors, NCAM Foundation

(57) Abstract :

ABSTRACT Our invention DURING COVID -19 CHALLENGES AND OPPORTUNITIES FOR PROVIDING SAFE CARE AT REAL TIME DENTIST is a practices with a NHS agreement and those exclusively dependent on private patient charges both face issues, which are unique, yet all at once in any case testing by their own doing. Private dental specialists, a significant number of whom felt cast hapless during the actual lockdown, have been generally passed on to their own gadgets. Be that as it may, some, including Ben Atkins, President of the Oral Health Foundation, have tracked down up-sides from the adjustment of conditions. Ben focuses to virtual interviews as one region in which the patient experience has been hugely improved, achieved by dental specialists being compelled to alter the manner by which they work. Similarly, internet booking, remote structure filling and contactless appearance and take-offs are generally components of the patient excursion which have been 'standardized' by the pandemic and have now established a more understanding driven climate, which will at last help patients and over the long haul will bring about expanded income streams for rehearses. The reaction to Covid is continually changing and the pandemic enormously affects individuals and organizations. In dentistry, there stay genuine inquiries around financing, clawbacks, contracts, and the capacity of a few private practices to stay dissolvable with practically no particular government support, however notwithstanding these issues, we accept the calling can arise more grounded from the test. This feeling is borne out by the consequences of a new survey! In which 59% of respondents felt more good than pessimistic about the future outcome of their training. This reality alone should give every one of us motivation to be hopeful.

(57) Abstract :

ABSTRACT [500] Our invention Isolation and Characterisation of Oral Microbes is the dental caries is a critical general medical condition influencing various kids and grown-ups all through the globe. Notwithstanding, the pervasiveness of dental caries is expanding with expanding utilization of dietary sugar yet a few factors other than sugar are recommended for the etiology of dental caries including contribution of microorganisms and host factors. The microorganisms engaged with dental caries convert dietary sugar into corrosive which lead to demineralization of tooth veneer and eventually brings about improvement of dental caries. The mutants streptococci including S. mutans are proposed to be engaged with the etiology of dental caries. In specific situations dental caries can foster even without a trace of these life forms. Because of the dissimilarity in the etiology of this illness, we planned the review to detach microorganisms from dental caries and contrasted them and organisms segregated from solid people. That's what the outcomes uncovered in spite of the fact that mutants streptococci is a significant patron in the etiology of dental caries, yet some other non-mutans creatures can likewise add to dental caries etiology. The outcomes propose that appropriate thought for expulsion of non mutans cariogenic microscopic organisms ought to be given notwithstanding evacuation of mutants streptococci for the board of dental caries. The outcomes additionally recommend that a few future examinations zeroing in on evacuation of non mutans creature, mutants streptococci and both sort of organic entities and their resulting consequences for the executives of dental caries ought to be finished to grasp relative commitment of these organic entities in sickness etiology. What's to come examinations explicitly identifying treatment result after evacuation of mutants, non mutans and both sort of living beings in dental caries can raise new focuses for the executives of dental caries. This sort of study requires separate contemplations and ought to be finished to figure out ways of overseeing dental caries really.

(57) Abstract :

Our Invention Intelligent Dental Implants in Surgical Procedures is a Tooth misfortune is exceptionally an extremely normal issue; subsequently, the utilization of dental inserts is additionally a typical practice. Despite the fact that examination on dental embed plans, materials and procedures has expanded in the beyond couple of years and is relied upon to extend later on, there is still a great deal of work engaged with the utilization of better biomaterials, embed configuration, surface change and functionalization of surfaces to work on the drawn out results of the treatment. This paper gives a short history and advancement of dental inserts. It likewise portrays the sorts of inserts that have been created, and the boundaries that are by and by utilized in the plan of dental inserts. At last, it depicts the patterns that are utilized to further develop dental embed surfaces, and current advances utilized for the investigation and plan of the inserts. A hunt procedure was acted to observe qualified articles in English detailing the precision of dental inserts put in people with directed a medical procedure methods. The quest brought about 397 articles for screening. After the choice, 44 articles were incorporated for information extraction. 25 articles announced the precision of static directed a medical procedure with mucosa upheld guides, 22 with tooth-upheld, 3 with bone-upheld and 7 with dynamic directed a medical procedure. The underlying pursuit yielded an aggregate of 387 articles from PubMed. Two autonomous analysts (MNG and KBK) screened through titles and modified works and chose 88 articles for full-text survey. Articles that were not picked by the two analysts were added after understanding. After the full-text survey, 45 articles were chosen for information extraction. The work process for articles determination and purposes behind rejections are introduced in the flowchart. Out of 46 articles, 24 revealed precision with mucosa-upheld guides, 20 detailed with tooth upheld guides, 3 with bone-upheld guides and 7 announced exactness with dynamic medical procedure. An outline of the 22 investigations giving an account of the precision of SGS with mucosa-upheld guides shows that 7 were directed in Italy, 5 in Belgium, 3 in Brazil and 3 in the Netherlands. The most successive embed producers were Implement (500 inserts) and Nobel Biocare (423 inserts). The most incessant virtual products for arranging were the Simplant (Dentsply), utilized in 8 investigations and the Procera (Nobel Biocare), utilized in 6 examinations.

Dear Sriharsha Pudi,

On behalf of the Cureus Journal of Medical Science, I am writing to you to confirm your participation in and submission of peer reviews for the following (8) articles (with review completion date in parentheses):

1. A Simple Step by Step Technique for Management of Gagging in Edentulous Patient (Apr 20, 2022)
2. Prosthetic Rehabilitation and Its Effect on Head Posture (Mar 12, 2022)
3. Denture Marking for Forensic Identification Using Laser-Marked Stainless Steel Quick Response (QR) Code (Feb 07, 2022)
4. Efficacy of Bovine Hydroxyapatite and Collagen Along With Platelet-Rich Fibrin as a Scaffold and Human Chorion as a Membrane for Ridge Preservation: A Case-Control Study (Jan 11, 2022)
5. Open Reduction and Internal Fixation Versus Closed Reduction and Maxillomandibular Fixation of Condylar Fractures of the Mandible: A Prospective Study (Jan 04, 2022)
6. "Opinions And Suggestions Of Dentists On The Quality Of The Dental Camps Being Organized In Hyderabad City" – A Cross Sectional Study (Apr 10, 2020)
7. Intensive Speech Therapy Programme Combined with a Speech Bulb Prosthesis in the Prosthodontic Rehabilitation of Velopharyngeal Dysfunction (Feb 06, 2020)
8. Effectiveness Of Pre-operative Oral Medication of Ibuprofen and Ketorolac on Anesthetic Efficacy of Inferior Alveolar Nerve Block with Irreversible Pulpitis: Randomized Controlled Trial (Dec 05, 2019)

On behalf of the the entire editorial staff, I'd like to thank you for your continued support.

(54) Title (EN): IMPLANTABLE DEVICE FOR TEMPOROMANDIBULAR JOINT AND METHOD OF PRODUCTION THEREOF

(54) Title (FR): DISPOSITIF IMPLANTABLE POUR L'ARTICULATION TEMPORO-MANDIBULAIRE ET SON PROCÉDÉ DE PRODUCTION

(57) Abstract:

(EN): Exemplary embodiments of the present disclosure are directed towards an implantable device for complete replacement of temporomandibular joint comprising of a condyle component to reconstruct a mandibular end of the temporomandibular joint designed for movement within the implantable device with a plate; and a condyle surface where the plate is configured to mechanically secure the condyle component to a ramus surface of a patient undergoing implant with the aid of screws; and the condyle surface polished to generate a mirror effect to reduce the friction in the implantable device and infection rate; a zygomatic arch component to reconstruct a temporal bone (glenoid fossa) of the temporomandibular joint comprising at least one of: a plate; a plurality of multiple threaded counter sink holes; a plurality of conically tapered holes and a zygomatic arch surface, whereby the multiple threaded counter sink holes are structured within the plate; and a fossa component configured to be positioned between the condyle component and the zygomatic arch component to anchor the movement of the temporomandibular joint and the fossa component comprising of a low density biocompatible material made of a polycarbonate which is utilized in the additive manufacturing for the synthesis of implantable device for temporomandibular joint.

(FR): Des modes de réalisation pour exemple de la présente invention portent sur un dispositif implantable pour le remplacement complet de l'articulation temporo-mandibulaire, comprenant un élément condyle pour reconstruire une extrémité mandibulaire de l'articulation temporo-mandibulaire, conçu pour se déplacer à l'intérieur du dispositif implantable avec une plaque; et une surface de condyle, la plaque étant conçue pour fixer mécaniquement l'élément condyle à une surface de ramus d'un patient subissant un implant à l'aide de vis; et la surface de condyle étant polie pour produire un effet miroir pour réduire le frottement dans le dispositif implantable et le taux d'infection; un composant arcade zygomatique pour reconstruire un os temporal (la fosse glénoïde) de l'articulation temporo-mandibulaire, comprenant au moins un élément parmi: une plaque; une pluralité de trous de fraisage à filetages multiples; une pluralité de trous effilés coniques et une surface d'arc zygomatique, les trous de fraisage à filetages multiples étant structurés à l'intérieur de la plaque; et un élément fosse conçu pour être positionné entre l'élément condyle et

Welcome to AOMSI Telangana State Chapter

Greetings from organising committee of 6th annual conference of Maxillofacial Surgeons.

We are delighted to host the conference on 3rd and 4th of september 2021 at **MAMATA DENTAL HOSPITAL**, Khammam. The theme of the conference is **FOUNDATION TO FUTURE-essence of OMFS**.

The scientific programme is to emphasise on the fundamentals of OMFS to help the PG trainees in day to day practice. The stimulating scientific deliberations by eminent and experienced faculty and clinicians in our speciality shall ignite the minds of budding oral and maxillofacial surgeons.

It's a matter of great honour and privilege for the organising committee to invite you all to attend this event. We will ensure that your stay in Khammam is fruitful and safe.

Further paper and poster presentations to benefit the PG trainees are being planned in spite of pandemic.

Extracts from the Patents Act, 1990

Sect 120(1A)

Infringement proceedings in respect of an innovation patent cannot be started unless the patent has been certified.

Sec 128

Application for relief from unjustified threats

(1)

Where a person, by means of circulars, advertisements or otherwise, threatens a person with infringement proceedings or other similar proceedings a person aggrieved may apply to a prescribed court, or to another court having jurisdiction to hear and determine the application, for:

- (a) a declaration that the threats are unjustifiable; and
- (b) an injunction against the continuance of the threats; and
- (c) the recovery of any damages sustained by the applicant as a result of the threats.

(2)

Subsection (1) applies whether or not the person who made the threats is entitled to, or interested in, the patent or a patent application.

Sec 129A

Threats related to an innovation patent application or innovation patent and courts power to grant relief.

Certain threats of infringement proceedings are always unjustifiable.

(1)

If:

(a) a person:

(i) has applied for an innovation patent, but the application has not been determined; or

(ii) has an innovation patent that has not been certified; and

(b) the person, by means of circulars, advertisements or otherwise, threatens a person with infringement proceedings or other similar proceedings in respect of the patent applied for, or the patent, as the case may be; then, for the purposes of an application for relief under section 128 by the person threatened, the threats are unjustifiable.

Courts power to grant relief in respect of threats made by the applicant for an innovation patent or the patentee of an uncertified innovation patent

(2)

If an application under section 128 for relief relates to threats made in respect of an innovation patent that has not been certified or an application for an innovation patent, the court may grant the application the relief applied for.

Courts power to grant relief in respect of threats made by the patentee of certified innovation patent

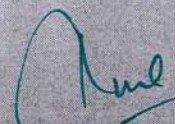

(3)

If an application under section 128 for relief relates to threats made in respect of a certified innovation patent, the court may grant the applicant the relief applied for unless the respondent satisfies the court that the acts about which the threats were made infringed, or would infringe, a claim that is not shown by the applicant to be invalid.

WORD FROM ORGANIZING COMMITTEE

Greetings from the Organising Committee of 5th Annual Conference of Association of Oral & Maxillofacial Surgeons of India, Telangana state chapter.

We are delighted to host this conference on 5th and 6th of JULY 2019 at MNR Dental college, Sangareddy.

This is first state level conference to be conducted in this part of Telangana. The Primary objective of this conference is to spread awareness of Oral and Maxillofacial surgery in the rural areas of Telangana.

The theme of this conference is recent **Advances, Basics and Controversies [ABC] of OMFS**. The scientific programme shall not only help in honing the skills of experienced maxillofacial surgeons but also provide plenty of opportunities for young surgeons and postgraduate students to present their work alongside their experienced colleagues.

The stimulating sessions shall encompass guest lectures, research papers, panel discussions and poster presentations.

It is a matter of great honour and privilege for the organising committee to invite you all to attend this event. We will ensure that your stay in Sangareddy is memorable and that you enjoy the conference.

MESSAGE FROM ORGANIZING COMMITTEE

Dr. N. Viveka Vardhan Reddy
Chairman, Organizing Committee

Dr. Srinivas Gadipelly
Organizing Secretary

Greetings from the Organizing Committee of 4th Annual Conference of Association of Oral & Maxillofacial Surgeons of India, Telangana state chapter!

We are delighted to host this conference on 14th and 15th of July 2018 in the city of Hyderabad which is considered as the best city to live in India. The auditorium in Krishna Institute of Medical Sciences, Secunderabad with state of the art facilities will be the venue for the scientific deliberations. The scientific program shall be designed to not only help in honing the skills of the experienced maxillofacial surgeons but also there will be plenty of opportunity for young surgeons and postgraduate students to present their work alongside their experienced colleagues. The stimulating sessions shall encompass guest lectures, research papers, panel discussions and poster presentations.

It is a matter of great honor and privilege for the organizing committee to invite you all to attend this event. We will ensure that your stay in Hyderabad is memorable and you enjoy most stimulating conference.

Dear office bearers,

Telangana state chapter AOMSI.

The organizing committee of the 3rd Telangana State Chapter of AOMSI annual conference, extend their warm wishes to the Office bearers of the Telangana State Chapter of AOMSI for giving us the opportunity for conducting the conference at *Sri Sai College of Dental Surgery, Vikarabad* during *1st – 3rd September 2017* and subsequently for their extended support in successful conduction of the conference.

The conference was vastly successful primarily due to the vibrant scientific sessions in addition to having a good number of registrations accounting to nearly 210 in the form of delegates and PG's not only from the state of Telangana but also from the states of Andhra Pradesh & Karnataka.

Subject: Award of Prime Minister's Fellowship for Doctoral Research

Dear Vijaykumar,

Congratulations!

I am happy to inform you have been selected to receive the prestigious scholarship 'Prime Minister's Fellowship for Doctoral Research'. This is a unique, highest-paying scholarship of Science & Engineering Research Board, Department of Science and Technology, Government of India and Confederation of Indian Industry. Your application went through a rigorous selection process, and was scrutinized by high level Apex Council comprising experts from academia and industry.

The aim of the Prime Minister's Fellowship Scheme is to bring industry closer to academia through cutting-edge research and give the benefit of dual exposure to both industry and academia to PhD scholars. With companies from across the world and top notch academic and R&D institutions of India partnering in this scheme, the Government and industry are hopeful of creating a new kind of research movement in the country which will nurture the talent of bright young scholars and make them industry-ready.

I congratulate you on being selected to receive this scholarship and wish you the best in your academic and personal endeavours.

As a next step, you are required to sign a Memorandum of Agreement (MoA) with your institute and industry partner for clarity of roles and responsibilities of each party involved. A suggested template of the MoA is attached for your reference. You may suitably modify or alter it as per your requirement.

It will be your responsibility to get the requisite portions in the MoA (marked in red) filled and signed. **Make four copies** of it (one for each party), have the authorized personnel **sign each page of all the copies of the MoA** and send them to us at the address given below for us to sign and send back three copies to you.
